Recommendations on Analytical Testing
in DUID Cases

by
Laurel Farrell

Recommendations on Analytical Testing in DUID Cases

Abstracts:

This presentation focuses on the article with the same title authored by Laurel Farrell, Dr. Sarah Kerrigan and Dr. Barry Logan published in Journal of Forensic Sciences in 2007. Investigation of a suspected drug impaired driving case ideally includes the collection and analysis of a biological specimen. This presentation provides the data supporting the need for a comprehensive toxicological analysis and standardization among toxicology laboratories operating in the field of drug impaired driving.
